

CAMEROON DEVELOPMENT CORPORATION

GROUP BANANA

SPECIFICATIONS OF BRAND NEW TRAILERS

- I. **GENERAL:** The intended trailers are to be used for the transportation of farm materials and chemicals to the field. They will be covering an average of 20km per day. Therefore the trailers to be purchased must be brand new and reliable and tailored for tropical weather and bad road condition.

Therefore, the contractor or supplier must be an authorized licensed automobile dealer, reliable and his auto facility readily accessible with adequate stock of spare parts that can be obtained easily for the effective maintenance of the trailer purchased.

The following documents are required in order to ascertain legibility:

- 1) The contractor/supplier must be an authorized dealer by the Auto-Manufacturer.
- 2) The contractor/supplier must have a Dealer's license from Cameroon Government.
- 3) The contractor/supplier must have a Dealer's sales and maintenance facilities located within Cameroon.
- 4) The contractor/supplier must provide a servicing and maintenance guarantee period of One (1) year.
- 5) The contractor/supplier must have a training program for project drivers and mechanics before the trailer is supplied.
- 6) The contractor/supplier must provide Data Characteristic Sheet containing a pictorial view of the trailer, chassis data, suspension data, Brakes system data, weight capacity and tractor dimension data from the auto-manufacturer.
- 7) Guarantee from the manufacturer that the spares will be available for at least twenty (20) years.
- 8) Availability of training on the use and maintenance of the equipment, including details of the training.
- 9) Quotations should contain the relevant pictures
- 10) Users Manuals in English
- 11) Workshop Manuals in English
- 12) Spare Parts Catalogue in English
- 13) Essential spares to cover one year use.
