PRESS RELEASE

CDC WORKERS CALL OFF STRIKE

On 27th April 2022, the attention of the Management of Cameroon Development Corporation (CDC) was drawn to two letters, one addressed to the Governor, South West Region and the other to the General Manager of CDC, that were floating on social media platforms from "Coalition of Workers" bearing notification of a strike action if nothing is done to pay accrued wages/salaries by 15th May 2022.

It was established that no group officially exists as "Coalition of Workers" and the nine persons who wrote and signed the letters are not elected Staff Representatives. However, six out of the nine signatories were identified as CDC workers and thus invited for a meeting in the General Manager's Office on Friday April 29th 2022 in the presence of the Director of Human Resources and the Industrial Relations Officer. Only four out of the six workers responded to the invitation.

Management understood that workers were expressing their frustrations due to the irregular payment of wages/salaries for the past 27 months. The GM informed the workers that Management is exploiting all avenues to ensure that salaries are paid regularly, emphasizing that it is absolutely necessary for workers to return to work for the Corporation to produce, sell and generate revenue necessary to salvage the present predicament. He further explained that Management is also concerned about workers' security on the plantations.

The workers left satisfied promising to communicate the message to their colleagues to exercise patience and get back to work. They also promised to call off the intended strike.

Franklin Ngoni Njio
GENERAL MANAGER
